

**Commerce 3KD3  
Database Design and Management  
Fall 2022 Course Outline**

**Information Systems Area  
DeGroote School of Business  
McMaster University**

---

***COURSE OBJECTIVE***

---

The growth of the Internet and electronic commerce has tremendously amplified the importance of database technology, knowledge, and skills. In this course, students will be able to learn the basic concepts of database and data warehouse and gain the first-hand experience through developing a database for a real-world e-commerce application.

---

***INSTRUCTOR AND CONTACT INFORMATION***

---

Section	Date & Time	Location
C01	Mondays, 2:30 PM - 5:20 PM	T13 107
C02	Tuesdays, 8:30 AM - 11:20 PM	HH 102
C03	Mondays, 11:30 AM - 2:20 PM	ABB 166

Instructor	Sections	Emails	Office
Mona Nasery	C01, C03	<a href="mailto:naserym@mcmaster.ca">naserym@mcmaster.ca</a>	DSB A212
Wenting Wang	C02	<a href="mailto:wangw64@mcmaster.ca">wangw64@mcmaster.ca</a>	DSB A212

Office Hours: To be arranged or make an appointment

Students TAs	Emails
Rania Malik	<a href="mailto:malikr15@mcmaster.ca">malikr15@mcmaster.ca</a>
Fateme Akbari	<a href="mailto:akbarif@mcmaster.ca">akbarif@mcmaster.ca</a>
Yaxian Zhou	<a href="mailto:zhouy393@mcmaster.ca">zhouy393@mcmaster.ca</a>

---

### ***COURSE ELEMENTS***

---

Credit Value:	3	Leadership:	Yes	IT skills:	Yes	Global view:	Yes
A2L:	Yes	Ethics:	Yes	Numeracy:	No	Written skills:	No
Participation:	Yes	Innovation:	Yes	Group work:	Yes	Oral skills:	Yes
Evidence-based:	Yes	Experiential:	Yes	Final Exam:	No	Guest speaker(s):	No

---

### ***COURSE DESCRIPTION***

---

This course is designed to introduce the basic concepts of database and data warehouse. Data modeling and database access through SQL are emphasized. Current trends in data warehouse and data mining will be discussed. Students will learn how to design database through three assignments and gain first-hand experience through developing a database for real-world e-commerce application in a term project. Basic knowledge of information systems and computer programming is required for taking this course.

---

### ***LEARNING OUTCOMES***

---

Upon successful completion of this course, students will be able to complete the following key tasks:

- Understand the database planning and database development process
  - Build data model for database applications
  - Learn SQL for database creation and access
  - Understand Web-Database connection, XML
  - Understand the basic concept of data warehouse and business intelligence
  - Learn data warehouse modeling
- 

### ***COURSE MATERIALS AND READINGS***

---

#### ***Required:***

3KD3 Course Materials Are Available on Avenue To Learn  
<http://avenue.mcmaster.ca>

[J] Nenad Jukic, Susan Vrbsky, and Svetlozar Nestorov, Abhishek Sharma (2020), Database Systems: Introduction to Databases and Data Warehouses, Edition 2.0 Prospect Press, eISBN-13:978-1-943153-67-1 (<https://redshelf.com/book/1560975/database-systems-1560975-9781943153671-nenad-jukic-susan-vrbsky-svetlozar-nestorov-abhishek-sharma> or [https://campusstore.mcmaster.ca/cqimcm/ws/txsub.pl?wsTERMG1=224&wsDEPTG1=COMMERCE&wsCOURSEG1=3KD3&wsSECTIONG1=DAY%20C02&crit\\_cnt=1](https://campusstore.mcmaster.ca/cqimcm/ws/txsub.pl?wsTERMG1=224&wsDEPTG1=COMMERCE&wsCOURSEG1=3KD3&wsSECTIONG1=DAY%20C02&crit_cnt=1))

**Optional (A comprehensive textbook for those want to learn more about the subject):**

---

## **COURSE OVERVIEW AND ASSESSMENT**

---

Learning in this course results primarily from reading, in-class discussion, assignments, projects, and quizzes. Assignments should be done individually, and project can be done in group in which group members will share the same grade adjusted by peer evaluation. Missed tests/exams will receive a grade of zero unless the student has submitted and been approved for a Notification of Absence or MSAF. Late assignments will be penalized 10% for each day they are late. Your final grade will be calculated as follows:

### **Grading Components and Weights**

EVALUATIONS	WEIGHT	DESCRIPTION
Participation	10%	Attendance (5%) and engagement (5%) in weekly class and tutorials
Quizzes	20%	Completion of weekly quizzes in Avenue. 10 quizzes with 2% each
Individual Assignment	45%	Submission of 3 assignments to Avenue by the due date and time; 15% each
Group Assignment	25%	Submission of team project proposal (5%), PowerPoint presentation (15%), and peer evaluation (5%) to Avenue by the due date and time

---

## ***COURSE DELIVERABLES***

---

### ***Participation and Engagement (10%)***

Students are required to attend all classes, tutorials and actively participate in class discussion. Students are encouraged to engage actively in class discussions related to the material being presented by the instructor or TA. The instructor and the TA will feel free to cold-call on anyone at any time. Hence, it is very important that you prepare for each and every class and tutorials as appropriate. Opportunities for in-class participation include taking part in discussions during the lectures by: 1) Engaging in class exercises 2) Asking questions 3) Responding to questions posed by the instructor or other students 4) Making relevant comments on material covered. Participation marks will be based on your class attendance (5%) and engagement (5%). Missing a class without appropriate reason or notification to instructor will deduct 1 mark (1% of the course grade) up to 5 marks (5%). Mere attendance in class without engagement activity does not earn you any engagement marks. The grade is based on your final participation and engagement self-report.

### ***Weekly review Quizzes (20%)***

The weekly review quizzes are designed to test your understanding of reading materials. Students are required to read lecture notes and specified textbook chapters in each week before taking the quiz. For each quiz you can only try once. You need to finish the quiz within specified time period in each week.

### ***Assignment #1 – Database modeling (15%)***

This assignment is used for students to learn how to design a database for an online flower store using an E-R diagram and convert it to relational tables and check the normalization form of the tables.

### ***Assignment #2 – Database implementation using SQL (15%)***

This assignment is used for students to learn how to use Microsoft SQL server to create tables, enter data, and run queries to search the database and generate reports.

### ***Assignment #3 – Data warehouse modeling (15%)***

This assignment is used for students to learn how to model a data warehouse for an automobile insurance company for risk analysis.

### ***Team Project (25%)***

The team project is used for student teams to learn how to design and implement a database for an e-business application and learn how to work together as a team. Students will be randomly assigned to form teams. Each team consists of up-to five members. Representative e-business applications are recommended to student teams. Student teams need to: 1) submit project proposal, 2) make two project-in-progress reports in order to get feedback from instructors and TAs, 3) make project presentation and 4) provide peer review of other team's project presentations.

---

## ***COMMUNICATION AND FEEDBACK***

---

Students who wish to correspond with instructors or TAs directly via email must send messages that originate from their official McMaster University email account. This protects the confidentiality and sensitivity of information as well as confirms the identity of the student. Emails regarding course issues should NOT be sent to the Area Administrative Assistants. Instructors are required to provide evaluation feedback for at least 10% of the final grade to students prior to the final date by which a student may cancel the course without failure by default. Instructors may solicit feedback via an informal course review with students by Week #4 to allow time for modifications in curriculum delivery.

---

## ***REQUESTING RELIEF FOR MISSED ACADEMIC WORK***

---

In the event of an absence for medical or other reasons, students should review and follow the Academic Regulation in the Undergraduate Calendar [“Requests for Relief for Missed Academic Term Work”](#) and the link below;

<http://ug.degrootemcmaster.ca/forms-and-resources/missed-course-work-policy/>

---

## ***ACADEMIC INTEGRITY***

---

You are expected to exhibit honesty and use ethical behaviour in all aspects of the learning process. Academic credentials you earn are rooted in principles of honesty and academic integrity. **It is your responsibility to understand what constitutes academic dishonesty.**

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: “Grade of F assigned for academic dishonesty”), and/or suspension or expulsion from the university.

For information on the various types of academic dishonesty please refer to the [Academic Integrity Policy](https://secretariat.mcmaster.ca/university-policies-procedures-guidelines/), located at <https://secretariat.mcmaster.ca/university-policies-procedures-guidelines/>

The following illustrates only three forms of academic dishonesty:

1. Plagiarism, e.g. the submission of work that is not one's own or for which other credit has been obtained.
2. Improper collaboration in group work.
3. Copying or using unauthorized aids in tests and examinations

---

### ***AUTHENTICITY/PLAGIARISM DETECTION***

---

**Some courses may** use a web-based service (Turnitin.com) to reveal authenticity and ownership of student submitted work. For courses using such software, students will be expected to submit their work electronically either directly to Turnitin.com or via an online learning platform (e.g. A2L, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software.

**All submitted work is subject to normal verification that standards of academic integrity have been upheld** (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to [www.mcmaster.ca/academicintegrity](http://www.mcmaster.ca/academicintegrity).

---

### ***COURSES WITH AN ON-LINE ELEMENT***

---

**Some courses may** use on-line elements (e.g. e-mail, Avenue to Learn (A2L), LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course.

The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure please discuss this with the course instructor.

---

### ***ONLINE PROCTORING***

---

**Some courses may** use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer

activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

---

## **CONDUCT EXPECTATIONS**

---

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the [Code of Student Rights & Responsibilities](#) (the “Code”). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, **whether in person or online**.

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students’ access to these platforms.

---

## **ACADEMIC ACCOMMODATION OF STUDENTS WITH DISABILITIES**

---

Students with disabilities who require academic accommodation must contact [Student Accessibility Services](#) (SAS) at 905-525-9140 ext. 28652 or [sas@mcmaster.ca](mailto:sas@mcmaster.ca) to make arrangements with a Program Coordinator. For further information, consult McMaster University’s [Academic Accommodation of Students with Disabilities](#) policy.

---

## **ACADEMIC ACCOMMODATION FOR RELIGIOUS, INDIGENOUS OR SPIRITUAL OBSERVANCES (RISO)**

---

Students requiring academic accommodation based on religious, indigenous or spiritual observances should follow the procedures set out in the [RISO](#) policy. Students should submit their request to their Faculty Office **normally within 10 working days** of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also

contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests.

---

### ***COPYRIGHT AND RECORDING***

---

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, **including lectures** by University instructors.

The recording of lectures, tutorials, or other methods of instruction may occur during a course. Recording may be done by either the instructor for the purpose of authorized distribution, or by a student for the purpose of personal study. Students should be aware that their voice and/or image may be recorded by others during the class. Please speak with the instructor if this is a concern for you.

---

### ***EXTREME CIRCUMSTANCES***

---

The University reserves the right to change the dates and deadlines for any or all courses in extreme circumstances (e.g., severe weather, labour disruptions, etc.). Changes will be communicated through regular McMaster communication channels, such as McMaster Daily News, A2L and/or McMaster email.

---

### ***RESEARCH USING HUMAN SUBJECTS***

---

All researchers conducting research that involves human participants, their records or their biological material are required to receive approval from one of McMaster's Research Ethics Boards before (a) they can recruit participants and (b) collect or access their data. Failure to comply with relevant policies is a research misconduct matter. Contact these boards for further information about your requirements and the application process.

McMaster Research Ethics Board (General board): <https://reo.mcmaster.ca/>

Hamilton Integrated Research Ethics Board (Medical board): <http://www.hireb.ca/>

---

## ***ACKNOWLEDGEMENT OF COURSE POLICIES***

---

Your enrolment in Commerce 3KD3 will be considered to be an implicit acknowledgement of the course policies outlined above, or of any other that may be announced during lecture and/or on A2L. **It is your responsibility to read this course outline, to familiarize yourself with the course policies and to act accordingly.**

Lack of awareness of the course policies **cannot be invoked** at any point during this course for failure to meet them. It is your responsibility to ask for clarification on any policies that you do not understand.

---

## ***COURSE SCHEDULE***

---

### **COMMERCE 3KD3 Database Design and Management**

#### **Course Schedule**

Week	Date	Topic	Readings/Assignment
1	Sep. 6	Introduction to database approach, database planning and development process	Self-study: [J] Ch.1, Lecture Note 1 <b>VC:</b> organizing project teams, explain team project proposal
2	Sep. 12, 13	Entity-Relationship model	Self-study: [J] Ch.2, Lecture Note 2 [W1] Data Modelling Tutorial <a href="http://www.tutorialspoint.com/dbms/index.htm">http://www.tutorialspoint.com/dbms/index.htm</a> <b>VT:</b> E-R Practice, Discuss Ass 1 <b>Project proposal due Sep. 18</b>
3	Sep. 19, 20	Relational data model	Self-study: [J] Ch.3, Lecture Note 3 <b>VC:</b> Conversion ER to Tables <b>Class participation report update due Sep. 25</b>

4	Sep. 26, 27	Normalization theory	Self-study: [J] Ch. 4, Lecture Note 4 [W5] Database Normalization in SQL <a href="https://www.youtube.com/watch?v=l5DCnCzDb8g">https://www.youtube.com/watch?v=l5DCnCzDb8g</a> <b>VT:</b> Normalization practice <b>Assignment 1 due Oct. 2</b>
5	Oct. 3, 4	Data Definition in SQL	Self-study: [J] Ch. 5, Lecture Note 5 [W4] SQL Tutorial <a href="http://www.w3schools.com/sql/default.asp">http://www.w3schools.com/sql/default.asp</a> <b>VC:</b> Introducing Microsoft SQL server <b>Project part A due Oct. 9</b>
6	Oct. 10-16	Midterm Recess (Reading Week)	<b>No Class</b>
7	Oct. 17, 18	Data Manipulation in SQL	Self-study: [J] Ch. 5, Lecture Note 6 [W3] MicroSoft SQL Server <a href="http://www.microsoft.com/sqlserver/en/us/product-info.aspx">http://www.microsoft.com/sqlserver/en/us/product-info.aspx</a> <b>VT:</b> SQL practice <b>Assignment 2 due Oct. 23</b>
8	Oct. 24, 25	Transaction process	[J] Ap. 7, 9; [C] Ch. 15 <b>VC:</b> Student Project Consulting <b>Project part B due Oct. 30</b>
9	Oct. 31, Nov. 1	Web database application development	<b>VT:</b> Feedback on student project
10	Nov. 7, 8	Project Presentation	Student project presentation <b>Project presentation PPT due Nov. 13</b> <b>Project peer evaluation due Nov. 15</b>
11	Nov. 14, 15	Data warehouse and star schema	[J] Ch. 7, 8; [C] Ch. 13 [W6] Data warehouse tutorial

			<a href="https://www.youtube.com/playlist?list=PL99-DcFspRUoWh6w2E1gl-SR54Oq3M2lt">https://www.youtube.com/playlist?list=PL99-DcFspRUoWh6w2E1gl-SR54Oq3M2lt</a> <b>VT:</b> how to build a star schema
12	Nov. 21, 22	OLAP and multi-dimensional analysis	[J] Ch. 9; [C] Ch.13. [W7] Dimensional modelling (star schema) <a href="https://www.youtube.com/watch?v=cwpL-3rkRYQ&amp;list=PLrblyvYCdg0iAUQoxG5vI_yKqzZ2AcgGe&amp;index=1">https://www.youtube.com/watch?v=cwpL-3rkRYQ&amp;list=PLrblyvYCdg0iAUQoxG5vI_yKqzZ2AcgGe&amp;index=1</a> <b>VC:</b> discuss business analytics <b>Assignment 3 due Nov. 27</b>
13	Nov. 28, 29	Big data and NoSQL	[J] Ch. 10, Ap. 10; [C] Ch. 14; <b>VT:</b> summary of the course <b>Class participation final report due Dec. 4</b>
