COURSE DESCRIPTION

This course provides a broad introduction to international business in the contemporary world. Accordingly, the course covers a wide range of material touching on the international environment and on the operational issues encountered by firms doing business within that environment. It will seek to integrate and expand on the principles learned in core courses throughout the Commerce program. It will also focus on ethical issues in the international environment, seeking to show students how Multinational Corporation's (MNC's) actions, as well as businesses in general's impact on the rest of the world.

Approximately half of the course will focus on trade, investment theory, and the global environment, the remainder on strategy and the adaptation of managerial activities to the international environment. We will seek to use Canada and Canadian practices as a comparison point.

LEARNING OUTCOMES

Upon successful completion of this course, students will be able to complete the following key tasks:

- Understand some of the complexities of doing business in foreign markets.
- Analyze the business environment of a foreign market and identify the business opportunities.
- Understand how global challenges impact the role of businesses and their strategies.

MID-TERM ASSIGNMENT (10%)

The mid-term assignment is an individual assignment

The purpose of the mid-term is to get you reflecting about global issues in the context of IB.

Format Overview:

Using the concept of photography and or artwork, students will select an image from a portfolio of published images. By reflecting on the chosen visual content, you write a reflective paper on what you see, how you feel about, and your perspectives of global issues and implications for the role of business and business leaders in relation to the selected image. It's up to you how to interpret the image. The only criteria is to relate your interpretation of the image back to global issues and / or international business. This is a creative assignment.

This is an “open” project – there are no set rules. The only criteria is that the writing has to reflect a global issue or international management issue of theme of your choice. You should consider writing in first person format.

Requirements:

- Because this is a reflexive and creative piece of writing, there is no set page limit requirement or style guide. Typical length is between 4 – 10 pages long. You can follow the style guide under Written Deliverables but this is not mandated.
- You can supplement this assignment using multi-media if you wish (not mandatory)
- You must select one image and includes that in your submission.

- Please submit by 11:59pm on due date via Avenue

General Guidelines

GROUP PROJECTS

The purpose of group work is to prepare you as a productive, collaborative team players as you enter the workplace.

Group size: a minimum of four and maximum of six (4-6) students per group
Give your group a name!

Group marking scheme:

- As part of the group work requirement, team members are to conduct peer evaluations. **No peer evaluations signed and submitted as a group, there will be no mark awarded for the project**
- Peer evaluation serves to encourage reflexivity on group dynamics, individual contribution effort and process outcomes
- It is encouraged that all group members contribute and share their workload fairly. All group members will receive a single mark for all deliverables (word document PowerPoint and overall team presentation performance). The share of work weight assigned and signed off will determine the grade individual students receive.
- However, in the event of severe conflicts that cannot be resolved, the instructor has the sole discretion to award whatever grades he/she deems appropriate to individual members. Hence it is to everyone's best interest to seek collaboration and work proactively to resolve issues.
- To assist you in building a strong, high performing working team, I am requiring:
- **1 peer evaluation per group**, signed by all group members to be handed for group related projects and submissions.
- Use the peer evaluation process to voice concerns and hopefully resolve them before the larger portion of the project is due to complete. This is also a great tool to learn how to constructively evaluate the performance of other.
- Learn to deliver constructive feedback verbally. Do not rubberstamp this review as evaluations not done carefully at this time can set the stage for problems in the upcoming weeks, affecting your overall group assignment marks

WRITTEN DELIVERABLES

Unless otherwise directed, all hand-in assignments are expected to be in the best business standard.

- Double- spaced,
- 1" margins all around
- 12 point font in Times New Roman
- For citation follows the APA style

A. TERM PROJECT (50%)

There are three components to your term project:

Component	Weight	Due
A. Project Scope and Introduction	10%	Week 4
B. Market Selection Presentation	10%	Week 7
C. Country Presentation	15%	
D. Final Group Presentation	15%	Week 12

The project is done in the same group throughout the term. There will be peer evaluation at the end of each component.

The objectives of the project are as follows:

- To give students the opportunity to identify real world international business opportunities
- To conduct research in specific area of international business in greater depth than that achieved in lectures and case discussions
- To apply learned IB concepts, analytical frameworks, and class learning to the international activities of a company
- To give students practice in presenting and pitching a recommended IB strategy to “clients”
- To simulate teamwork and communication skills that are increasingly important in the business world

Overall Preparation Guide

- Treat this as a consulting assignment and pretend that you are pitching an international business opportunity to the selected company’s executives. Be specific about your audience. Who are you pitching to?
- Selecting your **target company**:
 - The key to a good IB project (any project) is the ability to identify a market opportunity or challenge (**a.k.a opportunity statement**), and using this opportunity statement as means to determine the appropriate IB strategy.
 - Your opportunity statement should reflect market opportunities / business challenges for the company and the select target market. Think about problems that go beyond expanding the product / service to a new country. Think of it from a customer need / environmental challenge / a human necessity not fulfilled, a social issue or an institutional issue (government or competition).
 - Your target company should have developed some form of capabilities in order to enter or expand in a foreign market.
 - Your opportunity statement formulates your project objective.
 - The context of this IB strategy needs to involve countries outside of Canada and US. The chosen company can be any company from any countries (including Canada and US).

- Identify 3 target foreign markets as logical options. Determine which market is the most appropriate based on a set of strategic criteria.
- You then develop a country presentation on the select target market.
- You prepare the final recommendation includes the mode of entry (e.g. acquisition, joint venture, licensing, establishing host-country facilities) and a realistic implementation plan
 - Highlight any risks and concerns resulting from your IB strategy (not all solutions are perfect).
 - Develop a high-level implementation plan based on a 1-3 year time horizon (length of time depends on the problem) with major milestones identified.
 - Remember: Why this is a good opportunity or an important issue to resolve must be clear (**purpose-driven**)

Tips for an excellent term project:

- There is no one-size fits all approach / template to this project.
- Your IB strategy and the type of analysis required is entirely driven by your opportunity statement depends on the chosen company
- At the beginning stage of the project, it is important that you:
 - Brainstorm as a group on ideas and problems
 - You can identify **a global problem / market challenge / need gap**
 - **Understand and articulate your “why”**- why is this opportunity interesting?
 - Decide what kind of target companies are best suited to solve and what countries may benefit from the solution.
 - Choose your company
 - Choose something you are interested in and motivated to learn more about
 - Larger or publicly traded companies have better information availability and accessibility, but they are less interesting. Do explore smaller and privately owned businesses as an option.
 - Companies that students have done work on in the past will only be accepted upon approval and a review of the prior paper completed

I. PROJECT SCOPE AND COMPANY INTRODUCTION (10%)

The purpose of the project scope is to identify your project objectives and introduce your Company.

This is mandatory to receive marks. (see template in the appendix)
- **Please submit via Avenue by 11:59pm on due date**

Evaluation Criteria:

- **A good project scope has an interesting and compelling opportunity statement and the company analysis is aligned with the identified opportunity.**
- Include all the required components

Academic dishonesty is to knowingly act or fail to act in a way that results or could result in unearned academic credit or advantage. This behaviour can result in serious consequences, e.g. the grade of zero on an assignment, loss of credit with a notation on the transcript (notation reads: "Grade of F assigned for academic dishonesty"), and/or suspension or expulsion from the university. For information on the various types of academic dishonesty please refer to the [Academic Integrity Policy](#).

Learn, etc.) using plagiarism detection (a service supported by Turnitin.com) so it can be checked for academic dishonesty.

Students who do not wish their work to be submitted through the plagiarism detection software must inform the Instructor before the assignment is due. No penalty will be assigned to a student who does not submit work to the plagiarism detection software. **All submitted work is subject to normal verification that standards of academic integrity have been upheld** (e.g., on-line search, other software, etc.). For more details about McMaster's use of Turnitin.com please go to www.mcmaster.ca/academicintegrity.

COURSES WITH AN ON-LINE ELEMENT

Some courses may use on-line elements (e.g. e-mail, Avenue to Learn, LearnLink, web pages, capa, Moodle, ThinkingCap, etc.). Students should be aware that, when they access the electronic components of a course using these elements, private information such as first and last names, user names for the McMaster e-mail accounts, and program affiliation may become apparent to all other students in the same course. The available information is dependent on the technology used. Continuation in a course that uses on-line elements will be deemed consent to this disclosure. If you have any questions or concerns about such disclosure please discuss this with the course instructor.

ONLINE PROCTORING

Some courses may use online proctoring software for tests and exams. This software may require students to turn on their video camera, present identification, monitor and record their computer activities, and/or lock/restrict their browser or other applications/software during tests or exams. This software may be required to be installed before the test/exam begins.

CONDUCT EXPECTATIONS

As a McMaster student, you have the right to experience, and the responsibility to demonstrate, respectful and dignified interactions within all of our living, learning and working communities. These expectations are described in the [Code of Student Rights & Responsibilities](#) (the "Code"). All students share the responsibility of maintaining a positive environment for the academic and personal growth of all McMaster community members, **whether in person or online**.

It is essential that students be mindful of their interactions online, as the Code remains in effect in virtual learning environments. The Code applies to any interactions that adversely affect, disrupt, or interfere with reasonable participation in University activities. Student disruptions or behaviours that interfere with university functions on online platforms (e.g. use of Avenue 2 Learn, WebEx or Zoom for delivery), will be taken very seriously and will be investigated. Outcomes may include restriction or removal of the involved students' access to these platforms.

Students should submit their request to their Faculty Office **normally within 10 working days** of the beginning of term in which they anticipate a need for accommodation or to the Registrar's Office prior to their examinations. Students should also contact their instructors as soon as possible to make alternative arrangements for classes, assignments, and tests.

Students are advised that lectures, demonstrations, performances, and any other course material provided by an instructor include copyright protected works. The Copyright Act and copyright law protect every original literary, dramatic, musical and artistic work, **including lectures** by University instructors.
